DML Observation

INSTRUCTIONS: Tally the activities people are doing on their own using the designated codes below. If people are working in a group, tally them in the 'group' column, and circle each group (example: (II) (III)).

M = Multimedia creation (photo/video editing, video importing/conversion, other multimedia work)

T = Touchscreen use: USING TOUCHSCREEN FUNCTIONALITY (Lenovo PCs)

S = Scanning (Document and book scanning, negative/slide scanning)

C = General Computing (Social Networking, word processing, web-browsing, email, chat, etc.)

TIME: 2:30

STAFF: EBG

NOTES (Interesting activity, use of technology, etc.):

- LARGE BATCH SCAN OF SLIDES
- AUDIO/VIDEO MIXING
- SCANNING 35MM FILM (USED EDSON SCANNING W/ PAPERING TAKEN OFF)

Could we collect more detailed data, more easily, with fewer errors, and manage it all more consistently?

And could we build more sophisticated and intuitive analysis tools that are totally reusable for all data by lots of people in our institution?

Could we then use data about space and service usage to make better decisions (even small ones)?

THE WEB HAS HAD THIS FOR YEARS

WEB ANALYTICS

**COLLECTING RICH RELATIONAL DATA FOR A NEW SERVICE IS
TRIVIAL OR EASY**

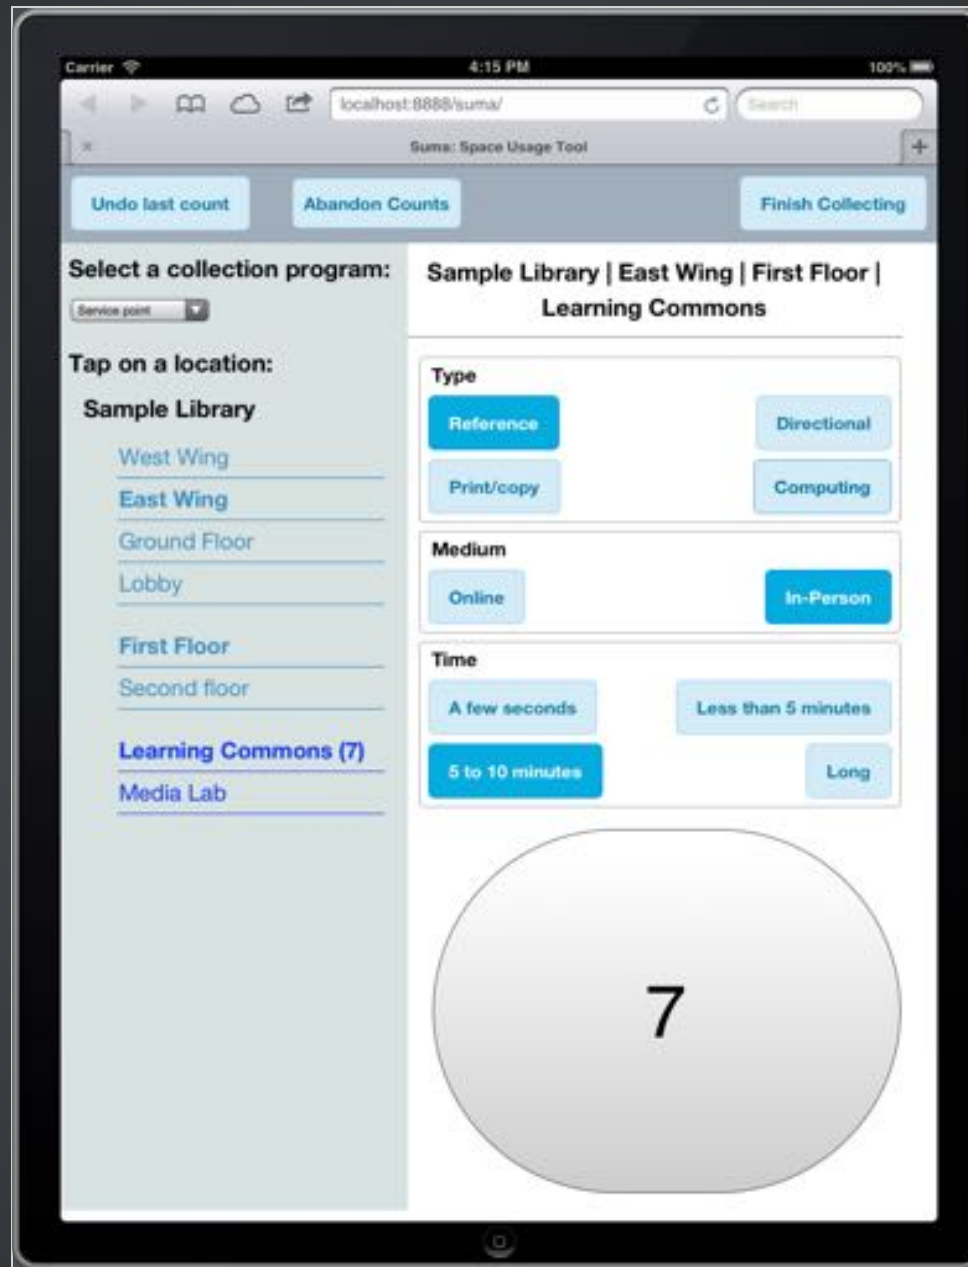

SUMA

An open source tablet-based app (well, toolkit) to aid library staff in assessment of how patrons are using library spaces.

In other words...the gathering, storing, exporting, analyzing, and visualizing of data across spaces/activities/time.

Show all the reference transactions in the learning commons between 11 PM and 1 AM on weekdays that are less than 5 minutes in length.

FILTERED REPORT

FILTERED REPORT

UNDERSTANDING OUR USERS

- Where do our users go?
- What are they doing?
- When are they doing it?
- What *could* they be doing?

SPACE AND SERVICE ANALYTICS

- Staff scheduling
- Building hours
- Service desk service patterns
- Study room reservations
- Technology and furniture use
- Use of specialized spaces (e.g. Graduate Commons)
- Comparing branch and main libraries, at different times of day
- Special Collections researcher services
- Turnaways (e.g. Technology Lending)
- Combine with other data: circulation, gate counts, tech lending, reserves, online services

OPEN SOURCE

- 60+ active academic library pilot projects
- Hosted on GitHub
- Pull requests are always welcome

PROJECT TEAM

- Jason Casden
- Bret Davidson
- Joyce Chapman
- Rob Rucker
- Rusty Earl
- Eric McEachern

THANK YOU!
